

Integrated PBM Results in Double-Digit Savings

Problem

A large national employer (115K employees) implemented ScriptAdvisor. A comprehensive analysis of their program revealed an opportunity for increased pharmacy savings through better clinical controls and visibility into all pharmacy claims.

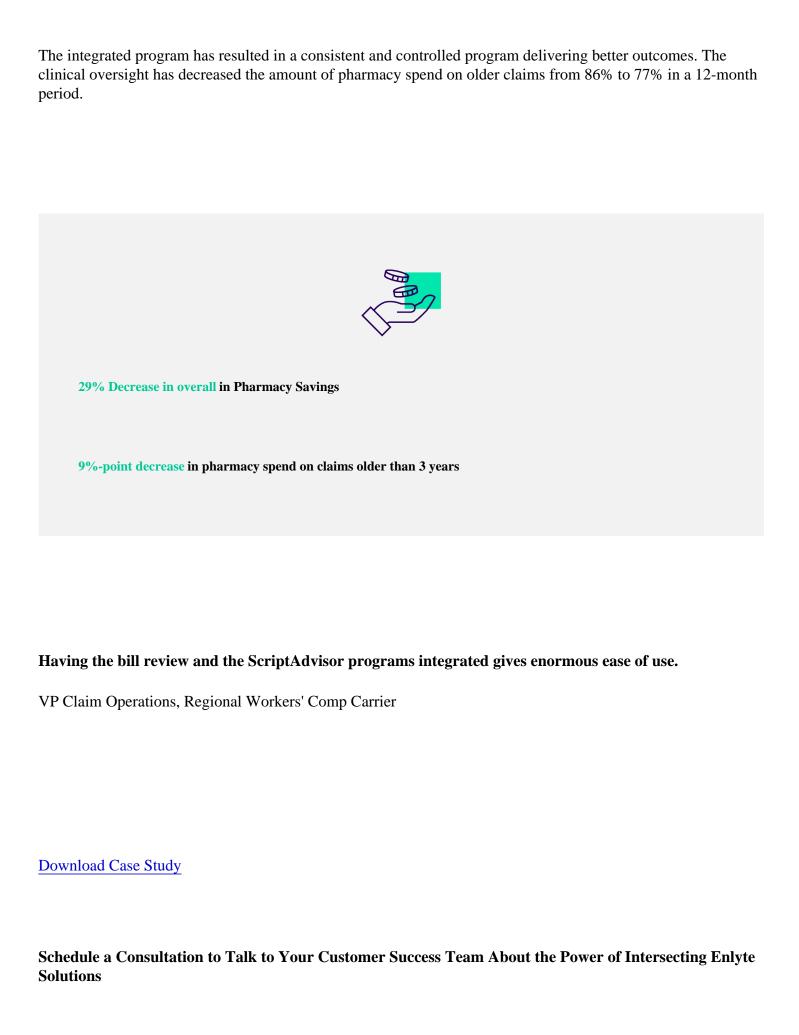

Solution

ScriptAdvisor's integration with the Claims Examiner Portal (CEP) simplified end-user workflows by providing a unified view of the claim and making it seamless for users to move between pharmacy and bill review tasks. The increased visibility combined with the ScriptAdvisor clinical roundtable process on claims older than 3 years resulted in 100% clinical oversight.

Outcome
